CONTENTS

Bénard–von Kármán instability: transient and forced regimes. M. Provansal, C. Mathis and L. Boyer *page* 1

A finite-element study of the onset of vortex shedding in flow past variously shaped bodies. C. P. Jackson 23

A turbulent flow over a curved hill. Part 1. Growth of an internal boundary layer. V. Baskaran, A. J. Smits and P. N. Joubert 47

Organized structures in a compressible turbulent bounday layer. Eric F. Spina and Alexander J. Smits 85

Surface effects of vertically propagating gravity waves in a stratified fluid. Erland Källén 111

Effect of acoustic excitation on the flow over a low-*Re* airfoil. K. B. M. Q. Zaman, A. Bar-Sever and S. M. Mangalam 127

Inviscid flow about a cylinder rising to a free surface. John G. Telste 149

Three-dimensional numerical simulation of convection in low-Prandtl-number fluids. M. Meneguzzi, C. Sulem, P. L. Sulem and O. Thual 169

Free-surface flow over a step. A. C. King and M. I. G. Bloor 193

Stability of the unsteady viscous flow in a curved pipe. Demetrius Papageorgiou 209

Speckle measurements of convection in a liquid cooled from above. R. Meynart, P. G. Simpkins and T. D. Dudderar 235

The growth and breakdown of streamwise vortices in the presence of a wall. Jerry D. Swearingen and Ron F. Blackwelder 255

Experimental study of three shock wave/turbulent boundary layer interactions. Alexander J. Smits and Kin-Choong Muck 291

Approximating the equations governing rotating fluid motion: a case study based on a quasi-geostrophic model. A. A. White 315

Melt motion in a Czochralski crystal puller with an axial magnetic field: motion due to buoyancy and thermocapillarity. L. N. Hjellming and J. S. Walker 335

Turbulent oscillatory flow over rough beds. J. F. A. Sleath 369

The exciting force on a submerged spheroid in regular waves. G. X. Wu and R. Eatock Taylor 411

Similarity solutions for stratified rotating-disk flow. J. D. Goddard, J. B. Melville and K. Zhang 427

Shear dispersion looked at from a new angle. RONALD SMITH 447

Perturbation theory for approximately integrable partial differential equations, and the change of amplitude of solitary-wave solutions of the BBM equation. J. G. B. BYATT-SMITH 467

On the change of amplitude of interacting solitary waves. J. G. B. BYATT-SMITH 485

Nonlinear interactions of gravity–capillary waves: Lagrangian theory and effects on the spectrum. KLAATJE VAN GASTEL 499

The formation of a layered structure when a stable salinity gradient is heated from below. HARINDRA J. S. FERNANDO 525

Natural convection in a shallow cavity. JERRY E. DRUMMOND and SEPPO A. KORPELA 543
